

Mentors, Facilitators and Counsellors (The Volunteers)

The GFPFA Volunteers will be positive STEAM role models for our learners, sharing their knowledge and experiences in aviation, space, technology, other STEAM-related fields, as well as soft skills. The volunteers will support the learners through activities following the schedule of the camp and any other programmes that they signed up for, and spearhead small group discussions. They may also lead the group offsite and would fulfil legal chaperone requirements. The volunteers will guide each learner to delve deeper into their aviation, space, and other STEAM-related interests.

Time Commitment*
